JavaScript, React, Redux, HTML, CSS, Ruby on Rails, Mongoose, MongoDB, Node.js, Express.js, SQL, SQLite3, PostgreSQL, Webpack, jQuery, Git, Heroku, SCSS, Google Maps API, Quickbooks, NetSuite

PROJECTS

Trace | (*React / Redux, Ruby on Rails, JavaScript*)

[live](#) | [github](#)

A full stack route and workout application inspired by STRAVA and deployed on Heroku

- Constructed a running route making functionality by utilizing Google Maps API and Directions API, granting users to generate personal routes based on the locations that they choose.
- Designed RESTful APIs and a structured state into a normalized shape, allowing for smoother CRUD capability for the user's workout component.
- Able to keep track of current routes and workouts through an activity feed that seemingly integrated both CRUD components.

What's Cooking | (*JavaScript, MongoDB, Express, React / Redux, Node*)

[live](#) | [github](#)

A full stack project that generates recipes based on the ingredients entered

- Developed a backend request function to a recipe api database utilizing axios, providing the front-end with accurate and functional data models.
- Worked with 3 other engineers and was able to achieve a highly effective workflow. Accomplished through daily check-ins, role reviews and team collaborations in order to tackle major tasks; leading to optimal team efficiency.
- Produced CRUD functionality for when users are signed, allowing them to create a 'grocery list' and a 'saved-recipes' component, giving the user the most optimal user experience.

Lava Escape | (*JavaScript, HTML, Canvas*)

[live](#) | [github](#)

Interactive 2D platform game where players try to survive for the high score

- Created a fully functional controller scheme formed with canvas, providing for a smooth gameplay experience for the user.
- Incorporated animation sprites and sound effects, achieving a fulfilling audio visual experience.
- Integrated a highscore system via Localstorage that is able to record the current player's score based on their gameplay, giving the application more of a competitive element.

EXPERIENCE

Property Accountant

Ollie

Jan 2019 - Apr 2020

- Managed property vendors, resident refunds, utility bills and account reconciliations allowing management to make decisions on key KPI reports.
- Conducted monthly, quarterly and annual close processes and ensured transactions are booked timely and in accordance with GAAP, allowing for accurate monthly team meetings.
- Assisted with company financial audits - procure reports and documents allowing for a smooth audit with no fail.

Staff Accountant

T&M Protection

Aug 2017 - Aug 2018

- Prepared/reviewed client invoices and reconciled with sales orders; ensured the proper posting of client invoice payments.
- Performed analytic reviews of financial results; completed/reviewed month-end journal entries, accruals and any adjusting or reclass entries for payroll, commissions and expense/revenue items.
- Ensured that all vendor payments are processed and recorded; processed accounts receivable/payable entries resulting in accurate financial records.

EDUCATION

AppAcademy - 16 Week Full-Stack Web Development Course with 3% acceptance rate.....02 / 2021

CUNY College of Staten Island, Staten Island, NY - BA Political Science - Dean's List.....01 / 2012
